Summary

I am a UI Developer with a passion for creating user-friendly interfaces. I graduated as a computer science engineer in 2021 and since then have been honing my skills as a UI developer. Proficient in front-end technologies such as HTML, CSS, JavaScript and Typescript, and experienced in working with RESTful APIs and other back-end services .

I have had the opportunity to work with a range of different UI frameworks and libraries, such as React Js, Angular Js. I am proud to have contributed to many successful projects and the development of innovative user-friendly interfaces. I also led a team of developers and collaborated with cross-functional teams to deliver high-quality software solutions on time.

Primary Skillset –

React Js | Redux | State Management | JavaScript | TypeScript | HTML | CSS

Other Tools & Technologies –

Figma | Draw.io | Postman

Technical Skills

Proficient in ReactJS, Redux, ReduxToolKit

DATABASES- MySQL, Postgres, MongoDB, ObjectBox

TESTING- Jest, Mockito React Testing Library

Technical Leadership, Mentor, Agile, Client Interaction, Team management

DOMAINS - Ecommerce, Healthcare, Logistics

DESIGN - Figma, Draw.io, Illustrator

Experience

Member of Technical Staff

Innobit Systems LLC.

Sep 2021 - Present.

- Currently working on a web app for a health sector client and responsible for leading the frontend changes.

- Designed and developed web applications from scratch using React, Node.js, Java.

- Created and maintained RESTful APIs for data exchange between front-end and back-end systems.

- Confirmed that completed software met client requirements in agile methodology.

Projects:- IPIS, Browntape, FPH.

Frontend Developer

Enco Engineers Pvt Ltd.

Apr 2021 - Sep 2021.

- Work closely with Team on scope of future projects and innovations.
- Implemented responsive design and optimized website performance to achieve fast loading times and improved user experience.

  Projects:- ERP Systems (Sanchalan)

Education

J.C Bose university of Science and Technology

Computer and Science Engineering

2017 - 2021

Projects

Integrated Passenger Information System(IPIS)

- This was my first project in innobits for which I have created two to three applications using Reactjs, and Electronjs integrated with Spring boot
- I work as frontend Developer in this project. I also implement packet transfer data through TCP/IP using JAVA.
- **Tech Stack: Reactjs, Electronjs,Spring boot, postgreSQL.**

Health Management System (FamilyproHealth)

- A health management system is a software platform or tool that is designed to help individuals or aged people to manage their health-related information and processes.
- I work as frontend developer and frontend team Lead of five members.
- **Teck Stack:- Reactjs,Nodejs,MySql**

Reconciliation Software (Browntape)

- It is a type of software that automates and standardises the reconciliation process to produce high-quality and accurate financial statements
- I worked as backend Developer and I implemented dynamic rule engine.
